

### **Pernix Continues to Grow in Guam with New Awards**

**LOMBARD, IL — November 11, 2016** — Pernix Group, Inc. announced the award of two new projects recently awarded to its wholly owned subsidiary, Pernix Guam LLC.

The \$26.4 million dollar contract with the Naval Facilities Engineering Command (NAVFAC) for the low observable/corrosion control/composite repair shop was awarded on September 30, 2016. This contract is for the work to provide environmentally controlled areas for on-aircraft low observable restoration and repair in support of the Guam strike mission at Andersen Air Force Base, Guam. The work to be performed includes the demolition of the existing composite shop and relocation of the existing cargo deployment facility (CDF). Additionally, the existing air freight terminal will be renovated to accommodate the relocated CDF and cargo reception facility. The project is scheduled for completion in October 2018.

Pernix Guam LLC also received a contract with Guam Waterworks Authority (GWA) in August 2016 for the \$18.2 million dollar Yigo and Astumbo Reservoir project. This project consists of the construction of three 2 million gallon pre-stressed concrete water tanks located on two different sites as well as the inspection and repair of an existing 2.5 million gallon steel water tank. The contract also includes demolition work, construction of vaults, valves, meter, booster pumps, control building, site pipelines and appurtenances, earthworks, civil work improvements, design build of approximately 3,500 lineal feet of 12" diameter water lines, and mechanical and electrical work. The project is scheduled for completion in December 2018.

"We are pleased to have received these awards and excited about expanding our business in Guam," said Scott Kroll, Pernix Guam's General Manager and Vice President of Operations. He went on to say, "With the 100% bonding secured and in place, we've kicked off strong and we expect construction to be starting in the next month for both jobs." Mr. Kroll added "Pernix is proud of our history working in the Pacific Rim. Our team in Guam has a long relationship working with NAVFAC Pacific as well as GWA. We look forward to these projects becoming another success."
